Rexnord Athletic - The Low Maintenance Solution for Chain Drives with High Load

- A special treatment of the bushes improves the characteristics of dry-running operation, causing maintenance needs to be reduced.
- A special coating of the pins offers a very good slip-characteristic.
- Due to a high performance long-term **lubrication**, an optimization of fatigue strength can be achieved.

All these treatments are applied directly to the chain joint surface.

Important Characteristics:

- Lower frequency of maintenance
- 100% transmitted load
- 100% compatible with DIN/ISO
- Extremely water-resistant
- Temperature range between -10°C and +150°C
