

## Stainless & Maintenance-Free

Products > Industrial Chains > Roller Chain > **Stainless & Maintenance-Free**

### **RexSuperPlus - Maintenance-Free, Rust and Acid-Resistant**

Characteristics of maintenance-free **RexCarbon** have been merged with the rust and acid resistance of **RexPlus** to create one product: RexSuperPlus.

- High power transmission and extraordinary corrosion protection.
- Long service life with a minimum of maintenance.
- A synthetic longterm lubricant is used for the ex-factory lubrication. It is resistant against water and steam, performs well in cold working environments and is registered with USDA H1.
- For achieving the normal wear-lifetime, re-lubrication is not necessary. In general, however, occasional **re-lubrication** improves the total lifetime of a chain drive.

### Application areas

- Food industry
- Packaging industry
- Bottling and beverage industries
- For all wet and damp areas
- Automotive industry

RexSuperPlus is available in sizes 08 B to 10 B.
